

NEWBOX

Euro-standard case NB

The Newbox Euro-standard case consists of a Newbox stackable container, a Newbox hinged lid with closures and one or more handles that make it practical and comfortable to carry.

Applications

The Newbox case makes it easier to transport the container manually. If accessories such as dividers, foam or insert boxes are added, it is an ideal tool case; however, it is also very well suited for other applications.

Available sizes

Basic dimensions (L×W in mm)

300×200
