

AUTOMATIC Box

Trays and tablets AB

The trays and tablets are real all-rounders in semi and fully automated handling systems. They enable the smallest manufacturing tolerances to be achieved in fully automated production cells. In addition, they are dimensionally stable, highly precise and extremely durable. They are available both as standard solutions as well as custom-made products.

Applications

Trays and tablets are ideal in the logistics system of goods distribution centres or for the transport of semi-finished products in the manufacturing logistics.

Special types

All non-stock items are marked thus and available on request only.
