

FUTURA

Open-fronted storage boxes FA

Futura is the latest and the ergonomic range of our open-fronted storage boxes. The broad recessed grips mean the container is extremely comfortable to transport. A transparent cover can be used to protect sensitive goods against dust and damage.

Together with the compatible carrier system, all sizes of this attractively designed model for use in workplaces and for organising items are perfectly suited for use in areas for customers or the public.

Applications

Open-fronted Futura storage boxes organise and protect your small parts in a clear manner.

Accessories

Labels and dust lids round off the Futura product range.

Tip

The Classicbox, Systembox and Futura ranges are mutually compatible.

We recommend that you also take a look at the following section, Rack systems for open-fronted storage boxes, which leaves almost nothing to be desired where optimal space utilisation is concerned.

Special types

All non-stock items are marked thus  and available on request.
