

BINS FOR SMALL PARTS

MINIBOX

VARIOBOX

FLIPTOPBOX

The range of bins for small parts consists of insert boxes (Minibox and Variobox) and hinged boxes (Fliptopbox) and provides the optimal internal subdivision for storing and transporting loose material and small parts.

The Variobox can be ordered as preconfigured in the stackable container or also loose for individual use (for example in Kanban systems).

The Minibox can also be used individually or in drawer and cabinet systems.

The Fliptopbox bins also maintain order with small parts but in addition are excellently suited as presentation cases or as promotional gifts.

Special types

All non-stock items are marked thus  and available on request.

Minibox

Available sizes (L×W×H in mm)
153×111×052
170×137×065
Material
PS
