

FLIPTOPBOX BLACK

Hinged box conductive FTB MC

The ESD version of the Fliptopbox Black hinged box is made from dimensionally stable polypropylene. The range covers a total of seven sizes. You can safely and firmly package your electronic components using a lid and box made from a single piece with a snap lock and integral hinge.

Applications

The conductive Fliptopbox models are ideally suited for safely storing and shipping small electronic parts.

Special types

All non-stock items are marked thus  and available on request.
