

PRINTING

Refine your containers with your logo or your company name. That way you will also create a good impression on the move.

We hot emboss your company logo according to your template or in standard font letters in the following colours:

It is also possible to carry out marking using injection into the plastic during the production process or also using pad or screen printing.

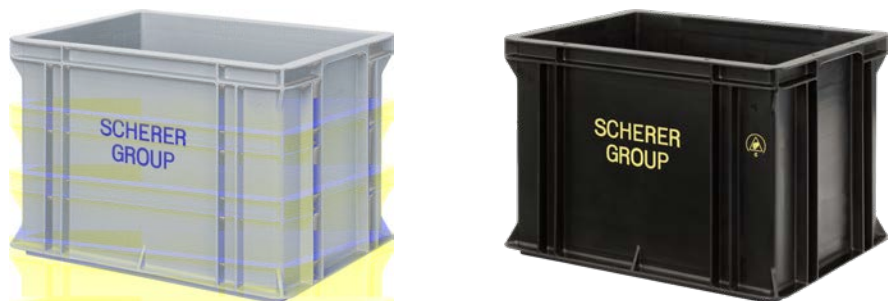

The durable marking withstands the effects of the production process and the weather and is suitable for modern cleaning plants.

Tip

We will gladly make you offer tailored to your specific requirements. Please contact us and we will be very pleased to advise you.

Examples of use

Hot-embossed marking (with standard lettering)

Hot-embossed marking (with company logo)

Injected marking (with company logo)
